can you write me a SPARQL query to get all cities with female mayors in southern germany?

oh, can you sort them by size?

can you write me a SPARQL query to get all cities with female mayors in southern germany?

oh, can you sort them by size?

Sure. In Wikidata, "size" could mean population or geographic area. For comparing cities, I'd use **population**, sorting from largest to smallest. We can add the population property (`P1082`) to the query and order by it.

One important detail: population figures may refer to different years, so the results are only as comparable as Wikidata's recorded data.

Here's the updated query. It also includes the population in the results.

sparql

```
SELECT DISTINCT ?city ?cityLabel ?stateLabel
                ?population ?mayor ?mayorLabel
WHERE {
  VALUES ?state {
    wd:Q980   # Bavaria
    wd:Q985   # Baden-Württemberg
  }

  ?city wdt:P17 wd:Q183 ;
        wdt:P131* ?state ;
        wdt:P31/wdt:P279* wd:Q515 ;
        p:P6 ?mayorStatement ;
        wdt:P1082 ?population .

  ?mayorStatement ps:P6 ?mayor .
  FILTER NOT EXISTS {
    ?mayorStatement pq:P582 ?endDate .
  }
```

Ask Gemini Argon

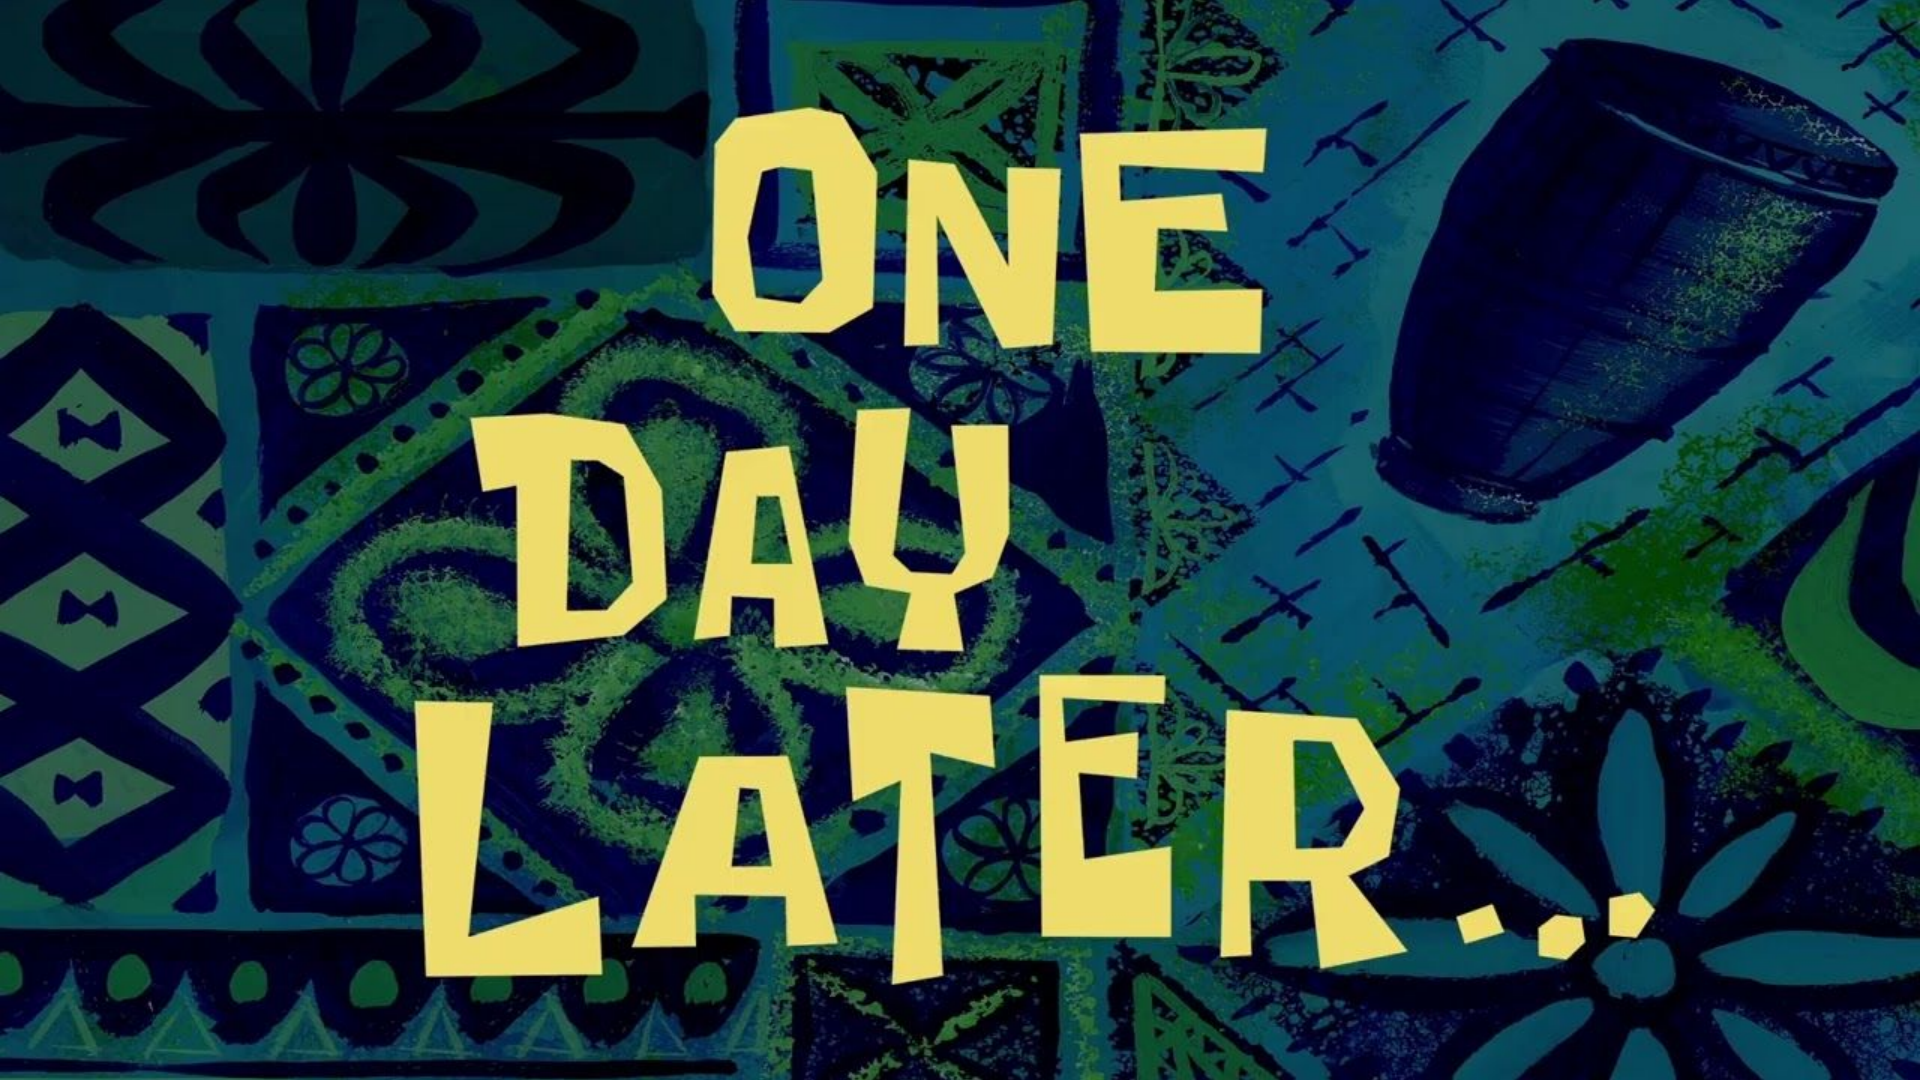

Gemini is AI and can make mistakes, including about people. Your privacy & Gemini

can you check about Regensburg again?

Good catch—my previous entry on **Regensburg** was wrong. While CSU candidate Astrid Freudenstein led the first round of the mayoral election on March 8, 2026 (with 37.5%), she lost the runoff election on March 22, 2026, to **Dr. Thomas Burger** (SPD), who won with 53.3% of the vote and succeeded Gertrud Maltz-Schwarzfischer (SPD) in May 2026. Regensburg therefore no longer has a female mayor. TVA

Taking a closer look across the rest of the list also reveals two other updates from the 2026 elections and municipal records:

- **Deggendorf:** Led by **Dr. Christian Moser** (CSU), who has been Lord Mayor since 2012 and was re-elected in March 2026 (Anna Eder ended her term in 2012). Stadt Deggendorf
- **Stutensee:** Longtime mayor Petra Becker stepped down in 2026; **Frank Burkard** won the July 2026 election and took office on October 1, 2026. Service-BW

ONE
DAY
LATER...

What are the ten largest cities in Southern Germany with a female mayor?

Following the March 2026 Bavarian municipal elections and recent mayoral transitions in Baden-Württemberg, no *Großstadt* (city with over 100,000 inhabitants) in Southern Germany (Bavaria and Baden-Württemberg) is currently led by a woman. Former female mayors of major southern cities—most notably Eva Weber in Augsburg, Gertrud Maltz-Schwarzfischer in Regensburg, and Eva Döhla in Hof—left office in May 2026, while Cornelia Petzold-Schick in Bruchsal stepped down in late 2025. Wikipedia

Consequently, the ten largest cities and municipalities in Southern Germany currently governed by a female Lord Mayor (*Oberbürgermeisterin*) or First Mayor (*Erste Bürgermeisterin*) are medium-sized towns (*Mittelstädte*), led by **Neu-Ulm**.

Rank		City / Municipality	State	Approx. Population	Mayor	Title & Party
1	✅	**Neu-Ulm**	Bavaria	~62,000	Katrin Albsteiger	*Oberbürgermeisterin* (CSU)
2	✅	**Rastatt**	Baden-Württemberg	~52,000	Monika Müller	*Oberbürgermeisterin* (SPD)
3	✅	**Freising**	Bavaria	~50,000	Monika Schwind	*Oberbürgermeisterin* (Freisinger Mitte)
4	✅	**Fellbach**	Baden-Württemberg	~46,000	Gabriele Zull	*Oberbürgermeisterin* (Independent / FW)
5	✅	**Forchheim**	Bavaria	~33,000	Martina Hebendanz	*Oberbürgermeisterin* (CSU)
6	✅	**Weil am Rhein**	Baden-Württemberg	~31,000	Diana Stöcker	*Oberbürgermeisterin* (CDU)
7	❌	**Vaterstetten**	Bavaria	~25,500	Maria Wirnitzer	*Erste Bürgermeisterin* (SPD)
8	❌	**Stutensee**	Baden-Württemberg	~25,400	Petra Becker	*Oberbürgermeisterin* (Independent)
9	✅	**Senden**	Bavaria	~23,000	Claudia Schäfer-Rudolf	*Erste Bürgermeisterin* (CSU)
10	✅	**Metzingen**	Baden-Württemberg	~22,500	Carmen Haberstroh	*Oberbürgermeisterin* (Freie Wähler)

What are the ten largest cities in Southern Germany with a female mayor?

Worked for 5m 39s

Taking **Southern Germany to mean Bavaria and Baden-Württemberg**, these are the ten largest cities whose current chief municipal executive is a woman, ranked by population as of October 2026. Population figures are approximate and based on the latest available official statistics.

Rank	City	Approx. population	Female mayor
1	**Neu-Ulm**, Bavaria	62,843	Katrin Albsteiger Stadt Neu-Ulr +1
2	**Rastatt**, Baden-Württemberg	50,753	Monika Müller Rastatt +1
3	**Fellbach**, Baden-Württemberg	46,659	Gabriele Zull Stadt Fellbacl +1
4	**Weil am Rhein**, Baden-Württemberg	32,361	Diana Stöcker Weil am Rhein +1
5	**Landsberg am Lech**, Bavaria	29,230	Doris Baumgartl Kommunalwal +1
6	**Lindau (Bodensee)**, Bavaria	25,702	Dr. Claudia Alfons stadtlindau.de +1
7	**Senden**, Bavaria	23,676	Claudia Schäfer-Rudolf Kommunalwal +1
8	**Metzingen**, Baden-Württemberg	23,305	Carmen Haberstroh Stadt Metzing +1
9	**Schramberg**, Baden-Württemberg	21,189	Dorothee Eisenlohr Stadt Schram +1
10	**Tettnang**, Baden-Württemberg	20,522	Regine Rist Stadtverwaltu +1

Two years ago...

what are the largest cities with a female mayor in the south of Germany?

Searched 3 sites

In southern Germany, several significant cities currently have female mayors:

1. **Munich (München)** - Eva Weber has been the mayor of Augsburg since 2020, representing the conservative CSU party. With a population of around 297,000, it is one of the largest cities in Bavaria with a female leader GERMAN BRIEF WIKIPEDIA .
2. **Regensburg** - Gertrud Malts-Schwarzfischer, affiliated with the SPD (center-left), has been mayor since 2020. Regensburg has a population of approximately 154,000 GERMAN BRIEF WIKIPEDIA .
3. **Freiburg im Breisgau** - Though smaller than Munich, it is a key city in Baden-Württemberg with a population of about 237,000. However, its current mayor is not female WIKIPEDIA RU GELD .

These examples highlight a growing presence of female leadership in prominent southern German cities, especially in Bavaria. Let me know if you want more details about their tenure or political background!

What are the prime factors of 142,669,429,933?

What are the prime factors of 142,669,429,933?

What are the prime factors of 142,669,429,933?

Thought for 374.3 seconds

To find the prime factors of $142,669,429,933$, we can use the method of trial division or Fermat's factorization method, which looks for integers x and y such that $N = x^2 - y^2$.

1. **Estimation:** First, we find the square root of N to determine the starting point for Fermat's method: $\sqrt{142,669,429,933} \approx 377,715.8$

2. **Fermat's Factorization Method:** We test values of x starting from $\lceil\sqrt{N}\rceil = 377,716$:

    - For $x = 377,716$: $x^2 - N = 377,716^2 - 142,669,429,933 = 142,669,484,656 - 142,669,429,933 = 54,723$ (not a square)

Therefore, the prime factors of $142,669,429,933$ are $377,663$ and $377,767$.

The prime factorization is: $142,669,429,933 = 377,663 \times 377,767$

What are the prime factors of 142,669,429,933?

Thought for 374.3 seconds

To find the prime factors of $142,669,429,933$, we can use the method of trial division or Fermat's factorization method, which looks for integers x and y such that $N = x^2 - y^2$.

377,663 x 377,767 =

1. **Estimation:** First, we find the square root of N to determine the starting point for Fermat's method: $\sqrt{142,669,429,933} \approx 377,715.8$

2. **Fermat's Factorization Method:** We test values of x starting from $\lceil\sqrt{N}\rceil = 377,716$:

   - For $x = 377,716$: $x^2 - N = 377,716^2 - 142,669,429,933 = 142,669,484,656 - 142,669,429,933 = 54,723$ (not a square)

● ● ●

Therefore, the prime factors of $142,669,429,933$ are $377,663$ and $377,767$.

The prime factorization is: $142,669,429,933 = 377,663 \times 377,767$

What are the prime factors of 142,669,429,933?

Thought for 374.3 seconds

To find the prime factors of $142,669,429,933$, we can use the method of trial division or Fermat's factorization method, which looks for integers x and y such that $N = x^2 - y^2$.

377,663 x 377,767 =

1. **Estimation:** First, we find the square root of N to determine the starting point for Fermat's method: $\sqrt{142,669,429,933} \approx 377,715.8$

2. **Fermat's Factorization Method:** We test values of x starting from $\lceil\sqrt{N}\rceil = 377,716$:

    - For $x = 377,716$: $x^2 - N = 377,716^2 - 142,669,429,933 = 142,669,484,656 - 142,669,429,933 = 54,723$ (not a square)

● ● ●

Therefore, the prime factors of $142,669,429,933$ are $377,663$ and $377,767$.

The prime factorization is: $142,669,429,933 = 377,663 \times 377,767$

What are the prime factors of 142,669,429,933?

Thought for 374.3 seconds

To find the prime factors of $142,669,429,933$, we can use the method of trial division or Fermat's factorization method, which looks for integers x and y such that $N = x^2 - y^2$.

377,663 x 377,767 = 1

1. **Estimation:** First, we find the square root of N to determine the starting point for Fermat's method: $\sqrt{142,669,429,933} \approx 377,715.8$

2. **Fermat's Factorization Method:** We test values of x starting from $\lceil\sqrt{N}\rceil = 377,716$:

    - For $x = 377,716$: $x^2 - N = 377,716^2 - 142,669,429,933 = 142,669,484,656 - 142,669,429,933 = 54,723$ (not a square)

● ● ●

Therefore, the prime factors of $142,669,429,933$ are $377,663$ and $377,767$.

The prime factorization is: $142,669,429,933 = 377,663 \times 377,767$

What are the prime factors of 142,669,429,933?

Thought for 374.3 seconds

To find the prime factors of $142,669,429,933$, we can use the method of trial division or Fermat's factorization method, which looks for integers x and y such that $N = x^2 - y^2$.

377,663 × 377,767 = 142,668,618,521

1. **Estimation:** First, we find the square root of N to determine the starting point for Fermat's method: $\sqrt{142,669,429,933} \approx 377,715.8$

2. **Fermat's Factorization Method:** We test values of x starting from $\lceil \sqrt{N} \rceil = 377,716$:

   - For $x = 377,716$: $x^2 - N = 377,716^2 - 142,669,429,933 = 142,669,484,656 - 142,669,429,933 = 54,723$ (not a square)

● ● ●

Therefore, the prime factors of $142,669,429,933$ are $377,663$ and $377,767$.

The prime factorization is: $142,669,429,933 = 377,663 \times 377,767$

What are the prime factors of 142,669,429,933?

What are the prime factors of 142,669,429,933?

Show code <>

The prime factors of **142,669,429,933** are **225,919** and **631,507**.

$$225,919 \times 631,507 = 142,669,429,933$$

Because it is the product of two prime numbers, 142,669,429,933 is a **semiprime**.

Hide code

Python

```python
def prime_factors(n):
    i = 2
    factors = []
    while i * i <= n:
        if n % i:
            i += 1
        else:
            n //= i
            factors.append(i)
    if n > 1:
        factors.append(n)
    return factors

print(prime_factors(142669429933))
```

Code output

```
[225919, 631507]
```

What are the prime factors of 142,669,429,933?

Show code <>

The prime factors of **142,669,429,933** are **225,919** and **631,507**.

$$225,919 \times 631,507 = 142,669,429,933$$ ✅

Because it is the product of two prime numbers, 142,669,429,933 is a **semiprime**.

ARTIFICIAL INTELLIGENCE

How Many R's in 'Strawberry'? This AI Doesn't Know

Though this very powerful technology remains full of promise, a recently discovered glitch shows AI is imperfect, so keep double-checking its results.

BY KIT EATON @KITEATON

AUG 28, 2024

WIKIMEDIA FOUNDATION

How many 'r' in Strawberry?

How many 'r' in Strawberry?

There are **3** "r"s in **Strawberry**.

How many 'r' in Strawberry?

There are **3** "r"s in **Strawberry**.

And in Stawberry?

How many 'r' in Strawberry?

There are **3** "r"s in **Strawberry**.

And in Stawberry?

Hide code

Python

```
word = "Stawberry"
print(word.lower().count('r'))
```

Code output

```
2
```

There are **2** "r"s in **Stawberry** (since the first one after the "t" is missing).
